DESCRIPTION

CIMCLEAN[®] 30 PINK is a multipurpose cleaner. It is an effective system cleaner for individual and central system clean out.

APPLICATION

CIMCLEAN[®] 30 PINK is recommended for cleaning individual machine and central system reservoirs, metalworking fluid lines, premix tanks, machines, and parts.

FEATURES AND BENEFITS

- It effectively removes biofilms, dirt, grit, chip-deposits, insoluble soaps and oils from central systems and individual machine sumps.
- Contains corrosion inhibitors to protect machines and parts from rusting.
- It is intended for use in systems working ferrous metals.
- Can be used for general-purpose floor cleaning as well as used in power washers, steam cleaners and automated floor scrubbers.

METHODS OF APPLICATION

CIMCLEAN[®] 30 can be used in three ways, all of which are effective:

As a cleaner: Drain used metalworking fluid and charge system with 2% CIMCLEAN[®] 30. Fill reservoir as full as possible so the mixture contacts all surfaces. Circulate for at least 2-4 hours through all lines and machine tools (does not cause rust), drain, rinse, and recharge with a fresh CIMCOOL[®] product.

With used fluid during shutdown: After production ceases, add one gallon of CIMCLEAN[®] 30 concentrate to each 50 gallons of dirty fluid in the machine reservoir or central system. Circulate the mixture for four hours or longer through all lines and machine tools. Drain, rinse and recharge.

With used fluid during production: Not recommended for individual machines unless carefully supervised. During production add one gallon of CIMCLEAN[®] 30 to each 100 gallons of dirty fluid in the machine reservoir. Circulate the mixture for 4 - 8urs, drain, rinse, and recharge.

RECOMMENDED STARTING DILUTIONS

CIMCLEAN[®] 30 is to be mixed with water for use. Always add concentrate to water. Add no other materials to the concentrate or mix unless approved by your CIMCOOL[®] representative.

- System cleaning: 2% to 4%
- Floor cleaning: 1% to 4%

CIMCLEAN® 30 PINK

CLEANER CONCENTRATE

TYPICAL PHYSICAL AND CHEMICAL PROPERTIES

Physical state: Liquid

Solubility in water: 100% Miscible

pH, concentrate: 11.5

Appearance and odor: Clear / Chemical

Specific gravity, (H₂O = 1): 1.08

pH, 2.0% mix, typical operating conditions: 11.0

HANDLING and STORAGE

If it is frozen, the product separates. Thaw completely at room temperature and stir thoroughly before use. Inside storage is recommended.
